

Clean Sky Conference

The aviation industry goes green

Brussels, 18 June 2010

Clean Sky Conference

The aviation industry goes green

Hotel Le Plaza, Brussels - 18 June 2010 morning

ABOUT THE EVENT

The Clean Sky Conference "The aviation industry goes green" will address the latest developments of the Clean Sky programme, highlighting the major technical steps to take in the near future. It is a unique opportunity for an update on Clean Sky and information exchange with the stakeholders.

WHO SHOULD ATTEND?

Representatives from the aviation industry, EU institutions, non-governmental organisations, national public authorities, the scientific and research community, and anybody interested in the Clean Sky programme.

The provided conditions remain valid till Monday 17th May 2010.

ABOUT CLEAN SKY

Clean Sky is the main European research programme for greening air transport; its objective is to reduce significantly the impact of aviation emissions and noise.

The Clean Sky Joint Undertaking aims at addressing the implementation of innovative, environmentally-friendly technologies in all segments of civil air transport, including large commercial aircraft, regional aircraft and rotorcraft, and in all supporting technologies such as engines, systems and materials life cycle.

The Clean Sky Joint Undertaking will deliver full scale demonstrators in all areas of research activities, which should be tested either in flight or on the ground, as a result of a fully integrated approach and monitoring of the technological progress and impact.
