

Aero-Ukraine

18 June 2010

Dear Sir/Madam,

As the coordinator of the Aero-Ukraine Project, I would like to invite you to participate at our second workshop titled “*Ukrainian –EU cooperation in aircraft engine manufacturing*“. The meeting (conference) that includes, besides SE Ivchenko-Progress who is a major Ukrainian aircraft engine manufacturer, and Antonov the well-known Ukrainian aircraft design bureau also the Ukrainian institutions taking part in research and technological development activities, will be held on the **5th of October 2010** in the premises of State Enterprise Ivchenko-Progress, Zaporozhye, Ukraine. The workshop will be organized in participation with all consortium partners and Advisory Board members of the Aero-Ukraine project.

However the emphasis will be laid on aircraft engine manufacturers and on the related research and technology development, the context will be more introductory than scientific. Besides of presenters from manufacturers mentioned above, you can expect presentations from representatives of Ukrainian R&T institutions that actively participate in the field of aircraft engine research, design and production.

I strongly believe, as this workshop will intend to include the main actors of the European aircraft engine manufacturing arena, both from Western and Eastern Europe, that you consider your presence as indispensable.

Yours faithfully,

Andrej Kocsis
